

# Dual Element, Time-Delay Fuse Cutaway

Model: 273-960

DAC Worldwide's Dual Element, Time-Delay Fuse Cutaway (273-960) is a detailed and professionally-crafted electrical fuse cutaway that depicts a common dual-element, time-delay industrial fuse. These fuses are commonly used on motor and pump starting circuits.

This common piece of electrical safety hardware is found in manufacturing facilities, petro-chemical plants, refineries, and other similar industrial and commercial applications.

The cutaway includes a formed-steel mounting assembly, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and support structures.

Through careful sectioning, the complete internal configuration of the fuse can be seen. All arc-quenching filler material has been removed while all primary internal features, including the overload and short-circuit elements, have been retained and showcased.

---

## **FEATURES & SPECIFICATIONS**

- Sectioning of an actual industrial component (common protective device brands and models chosen for industrial relevance, including selections from Bussmann, Littelfuse, Gould, and others).
- Removal of all arc-quenching filler material and sectioning of full length of the device.
- 13-gauge, formed-steel, powder coated mounting stand with 13-gauge component attachment brackets.
- Provision for mounting on related DAC Worldwide bench, workstation, and storage products.
- Packaging for shipment via parcel service.

## **PRODUCT DIMENSIONS**

- **Product Dimensions**  
(L x W x H)  
9in. x 9in. x 10in. (230 x 230 x 250 mm)  
6 lbs. (3 kg)

- **Shipping Dimensions**

9 lbs. (4 kg)

## **OPTIONS**

- Recommended #902V Mobile Display Stand
- #560-000 - Electrical Trades Training Manual (IPT)
- #560-001 - Electrical Trades Handbook (IPT)
- #920F - Display/Support Assembly
