

Storage Tank Relief Valve/Flame Arrestor Assembly Cutaway

Model: 273-470

DAC Worldwide's Storage Tank Relief Valve/Flame Arrestor Assembly Cutaway (273-470) is a sectioned tank relief valve/flame arrestor assembly cutaway that allows for detailed study of the design and operating principles of this important piece of process plant safety equipment.

Carefully-planned cutaway surfaces unveil internal detail of both the arrestor bank and the relief valve. All primary functional components, gaskets, and connection hardware are retained, allowing for introductory maintenance training activities.

A heavy-duty, formed-steel baseplate allows for benchtop mounting and mounting on related DAC Worldwide workstation and storage products.

Useful in training programs relating to process operations, plant maintenance, and plant safety, this professionally-crafted teaching aid will provide years of valve instruction in multiple applications.

FEATURES & SPECIFICATIONS

- Makes and models by industry leaders chosen for industrial relevancy.
- Cutaway of complete industrial tank relief valve and flame arrestor assembly.
- Finishing using a high-durability urethane coating.
- 7-gauge, formed-steel, power-coated mounting baseplate.
- Manufacturer's installation and maintenance manual.
- Crating for shipment via motor freight.

PRODUCT DIMENSIONS

- **Product Dimensions**

(L x W x H)
Approx. 9" x 18" x 28" (228 x 457 x 711 mm)
110 lbs (50 kg)

- **Shipping Dimensions**

(L x W x H)
15" x 22" x 30" (381 x 559 x 762 mm)
135 lbs (61 kg)

OPTIONS

- Recommended #902V Mobile Display Stand
