

Level Gauge Cock Valve Cutaway

Model: 273-450

DAC Worldwide's Level Gauge Cock Valve Cutaway (273-450) is a detailed gauge cock valve cutaway that depicts a common block valve used to isolate tank sight glasses for repair or replacement. This specialized valve is commonly found in manufacturing facilities, petro-chemical plants, refineries, and other similar process facilities.

The cutaway includes a formed-steel mounting assembly, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and support structures.

Through careful sectioning, the complete internal configuration of the valve can be seen, while also allowing for disassembly for more complete inspection. All primary features have been retained.

FEATURES & SPECIFICATIONS

- Sectioning of an actual industrial component (common industrial component brands and models chosen for industrial relevancy).
- Cleaning, priming, and painting all primary component parts using a high-durability urethane coating.
- 14-gauge, formed-steel, powder-coated mounting stand with component attachment brackets.
- Provision for mounting on related DAC Worldwide bench, workstation, display, and storage products.
- Manufacturer's installation, operation, and maintenance manual.
- Packaging for shipment via courier or parcel service.
