

Supplemental Inflatable Restraint System (model 1552)

The trainer uses an actual SIR System that electrically responds and operates as in the automobile. The Air Bag portion of the trainer is a non-functional disarmed unit. The Supplemental Inflatable Restraint System is based on a CAN platform vehicle.

Features:

- New vehicle components, connectors, and factory wire colors.
- Provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures.
- Intermittent and hard fault codes can be inserted using the built-in keypad, a single computer or the ATEch Network System (ANS).
- Ability to perform actual service manual test procedures.
- Compatible with ATEch's Instructor Management Program (IMP).
- Courseware includes Instructor Guide, Student Manual, and Service Manual Information.
- Crash simulation using sensor impact push switches and bag deployment strobe.
- Study of removal and installation of system components.
- Performing airbag disposal procedures.
- Includes internal power supply.
- Keypad displays built-in scan tool data.
