

Downsized Y-Type Globe Valve Cutaway

Model: 262D

DAC Worldwide's Downsized Y-Type Globe Valve Cutaway (262D) is a realistic, yet economical valve sample that allows for convenient classroom training in the operation, construction, and maintenance of a Y-type globe valve. This type of valve is often used for throttling service in industrial process systems.

Through carefully-planned sectioning and color-coding, the complete internal configuration of the valve is exposed and showcased. Seal features and hardware locations have been retained, allowing for "hands-on" training in maintenance.

FEATURES & SPECIFICATIONS

- Sectioning of actual hardware (popular, 3/4" - 1" valve makes and models chosen for industrial relevancy).
- Cleaning, priming, and painting using a high-durability, urethane coating.
- Color-coding of valve body, internal process surfaces, seat, and closure device using contrast colors.
- Replacement plated hardware where necessary.
- All gaskets, seals, and seats shown.
- 13-gauge, formed-steel, powder-coated support assembly, allowing for mounting on related display and storage products.
- Related flange and pipe assemblies, adapting to socket-weld and screwed varieties.
- Packaging for shipment via courier parcel service.
