

Charging System Troubleshooting (model 2816/2816N)

The Charging System Troubleshooting Trainer is a software program based on a Charging System and deals with the basic concepts of troubleshooting those automotive components. This program can operate in Random Mode, where the faults are selected randomly for each circuit chosen, or the instructor can select faults in various circuits to be activated as each student runs the program.

Features:

- Realistic operation of charging system.
- Built-in DVOM and Load Tester.
- Student performance is stored in Central Records or on a student USB drive as the student proceeds through the program.
- Instructor uses Instructor Management Program (IMP) to create student record, and assigns ID number and password for student login.
- Visual reinforcement of circuit behavior.
- [Network Version Available - model 2816N](#)

Activities Include:

- Troubleshooting section that can insert 19 possible faults into charging circuits for diagnosis in Training or Advance Mode.
