

Pipe Union Cutaway Set

Model: 273-740

DAC Worldwide's Pipe Union Cutaway Set (273-740) is a realistic sample set of pipe unions commonly found in petro-chemical plants, refineries, and other industrial applications. Three pipe union types are provided, reflecting three different closure/seal geometries and three materials.

This cutaway set includes a formed-steel mounting assembly, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and display assemblies.

Through careful sectioning, the complete internal configuration and connecting geometry of each union can be seen, while allowing for disassembly for more complete inspection. All primary features have been retained.

FEATURES & SPECIFICATIONS

- Sectioning of actual industrial hardware (common component brands and designs chosen for industrial relevancy).
- Cleaning and sealing using a clear coating.
- Replacement plated hardware where applicable.
- 13-gauge, formed-steel, powder-coated mounting stand with 13-gauge component attachment brackets.
- Provision for mounting on related DAC Worldwide bench, workstation, and display products.
- Packaging for shipment via parcel service.
