

Suspension and Steering System (model 500)

Features:

- Actual late-model, low mileage, vehicle components
- Steering - Fully operational steering wheel, tilt column, and rack and pinion assembly. Fully operational power steering pump driven by electric motor and drive belt.
- Suspension - Fully operational strut towers. Levers control the electric actuators to compress and expand each strut. The power steering pump provides hydraulic pressure to the complete steering column. Strut operation does not interfere with wheel rotation allowing for wheel alignment service.
- Tires - Front tire and alignment service.
- The trainer provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting and service procedures.
- Courseware includes Instructor Guide, Student Manual, and Service Manual Information.
