

# Water Pressure Regulator Cutaway

Model: 273-140

DAC Worldwide's Water Pressure Regulator Cutaway (273-140) depicts a common water service-type pressure regulator commonly found in manufacturing facilities, petro-chemical plants, and other industrial, commercial, and domestic environments.

The cutaway features sectioning of an actual industrial component. Common industrial component brands and models are chosen for industrial training relevance.

The cutaway boasts cleaning, priming, and painting using a high-durability polyurethane coating. It also features color coding of component parts where applicable. All internal components, including filter, are shown.

The cutaway includes a formed-steel mounting assembly allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and display structures.

Through careful sectioning, the complete internal configuration of the regulator can be seen, while also allowing for disassembly for more complete inspection. All primary features have been retained.

---

## **FEATURES & SPECIFICATIONS**

- Sectioning of actual industrial component
- Common component brands and models chosen for relevancy
- Cleaning, priming, and painting using a high-durability polyurethane coating
- Color coding of component parts where applicable
- All internal components including filter, shown
- 13-Gauge, formed-steel, powder coated, mounting stand with component attachment brackets and PVC pipe mounting spools
- Provision for mounting on related bench, workstation, and display products

## **PRODUCT DIMENSIONS**

- 9-in. L x 9-in. W x 10-in. H (230 x 230 x 250 mm)
- 10 lbs. (5 kg)

## **OPTIONS**

- Recommended #902V - Mobile Display Stand
